

Advanced and highly flexible portable 1-5 gas instrument for detecting the presence of over 20 gases. Useful in many applications as a personal monitor for pre-entry checks. Standard items include data-logging, a built-in sampling pump and an easy-grip, durable case.

- Large, fully-graphic back-lit display
- Data-logging standard using ORIONLINK® software
- Carbon-filled nylon case protects against RFI and corrosive gases
- Long-life battery with three-hour recharge
- Built-in pump with electrical PermaCheck™ function standard
- Two-year warranty on case, sensors, electronics and mechanical components

Compact. Durable. Ingenious.

Versatile and rugged, the updated ORIONplus IR Detector offers five gases with infrared and a wide range of sensor options. Our newly developed array of IR sensors will detect CO2 or hydrocarbons in LEL range or up to 100% by volume. MSA's 20L catalytic combustion sensors are "best in class" silicon-resistant and will reliably detect up to 100% LEL. Available toxic sensors include ammonia, chlorine and many other choices. Simply choose your IR sensor, add two toxic sensors and finish your unit with an oxygen and an LEL sensor.

Applications

- Oil, gas, and petrochemical
- Inerted confined spaces
- Agriculture and construction
- Fire service
- Utilities and telecommunications
- Municipal works and waste water
