

Welcome.

G7 is your work-everywhere, wearable, personal safety monitor. It keeps you connected to your team and brings help if the worst happens.

G7 can tell you when to evacuate and call for help instantly even if you can't. It has your back at all times.

Let's get started!

## YOUR G7

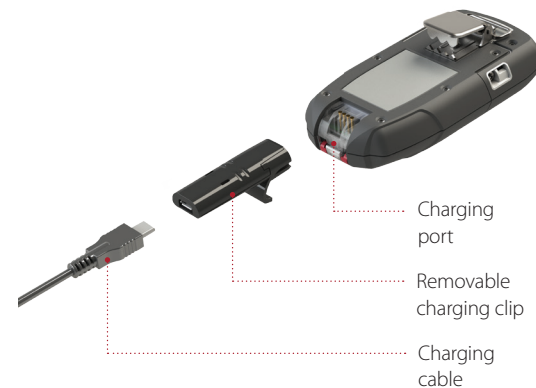

## CHARGING

To charge the battery, insert the micro USB plug into the removable charging clip, then slide the clip onto the charging port at the bottom of your G7.

A solid red light at the bottom of the device confirms your G7 is charging. The LCD screen will let you know when it is fully charged.

Blackline recommends that you fully charge your device after every shift.

## HOW IT WORKS

Interacting with G7 is easy with its high-visibility LCD display and three-button menu system.

### OK button

Press OK to enter the main menu on the LCD screen and to confirm a menu selection.

### Up and down arrow buttons

Press to navigate the menu. Press and hold both simultaneously to mute a yellow warning alarm or red alert.

### Latch pull

Pull down the latch to call for help when assistance is required.

### Latch push button

Push the latch in to check in and tell G7 that you are safe.

# ALARMS, ALERTS & NOTIFICATIONS

When G7 has something to tell you it uses colour, vibration, sound and screen messages.

## ARE YOU CONNECTED?

● ● ● **Blinking/Solid** 

G7 lets you know your connection status.

**Blinking**  
A blinking green SureSafe® light indicates your device is connecting to the Blackline Safety Network and your safety is not yet monitored.

**Solid**  
A solid green SureSafe light indicates you're connected and being monitored by the Blackline Safety Network.

**Sound and vibration**  
Configurable to sound an alarm if connection is lost after five minutes.

## ARE YOU SAFE?

● ● ● **Blinking** ● ● ●

G7 is asking you to confirm that you are safe.

Push the red latch button within a set period of time to confirm you are safe. If you don't push the latch button your G7 will communicate a red alert to monitoring personnel.

**Sound and vibration**  
Beeping alarm sound — an alarm sound and vibration, a pause, then an alarm sound and vibration, and another pause, etc.

**Personal pending alarms**  
Potential fall detected, potential no-motion detected, or check-in request.

## G7 HAS A MESSAGE FOR YOU

● ● ● ● ● **Rapid blinking** ● ● ● ● ●

Read your G7 screen.

Press and hold the up and down buttons at the same time to let your G7 know you have read the message. This will disable the audible and visual alarm.

**Sound and vibration**  
Urgent alarm sound — faster than yellow pending alarm sound.

**Personal warning alarms:**  
New message, voice call, network connection interruption, low battery, low warning alarm for gas, sensor error, sensor under limit, calibration or bump test is due.

## WE'RE HERE TO HELP

● ● ● ● ● **Rapid blinking** ● ● ● ● ●

If you need assistance or have not responded to a yellow pending alarm.

Red alerts are immediately communicated to monitoring personnel. Read the information on your screen. Press and hold the up and down buttons to mute. Muting will only silence the sound and vibration and does not cancel the alert to monitoring personnel.

**Sound and vibration**  
Critical alarm sound — an urgent sound and a constant vibration without any pauses.

**Remote alerts**  
Fall detected, no-motion detected, missed check-in, SOS alert, high alert for gas, STEL, TWA or over limit.

## WE'VE GOT YOUR BACK

● ● ● **Blinking** ● ● ●

Monitoring personnel have acknowledged your remote alert.

Lets you know that monitoring personnel are responding by following your team's emergency protocol. Once monitoring personnel have resolved the remote alert, the blue LiveResponse™ light will shut off.

**Sound and vibration**  
Depending on your response protocol, a G7c with a voice enabled service plan will automatically connect your speaker phone to monitoring personnel.

# FEATURES

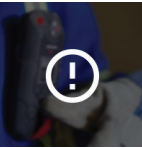

Your G7 is equipped with many features to monitor your safety. These are customizable to best fit your needs. Speak to your safety supervisor to learn about how your G7 is configured.

Fall detection
